I wanted to inquire to see if there are any laws, rules, or regulations regarding telehealth applications in Ohio's Practice Act for Physical Therapy. I wanted to start implementing a form of tele-rehab into my practice to see if it would work into my business model; following the ethics and informing my patients the pros and cons of this type of included rehab based on current research articles published through APTA and other sites. Could the board please give me some insight and information if any regarding this matter as I have found several states to allow it in practice and for consulting matters. I see nothing prohibiting it in Ohio. Sincerely, Andrew Mirabella

Good Afternoon, I work at the Ohio Bureau of Workers' Compensation in the Provider Relations Department, we have recently received a question concerning Physical Therapist performing EMGs. Could you please tell me if it is within the scope of practice for a physical therapist to perform EMGs on patients? Thank you for your time in this matter, Kara Russell, Phone: 614-728-5506

I work at CareWorks which is an MCO for BWC. We have recently received a request for a Physical Therapist to perform an EMG/NCV on a patient. Has the scope of practice for a Physical Therapist expanded to allow a needle EMG to be perform and interpreted by a PT? I know BWC is also submitting a question concerning this to your Board. Please provide the legal reference is this is now in the scope of practice. Thanks.

I am doing a paper on telerehabilitation regulations for PT by state. Your current state regulations do not have any wording of telehealth. Is that still correct and if so is a clinician allowed to practice removing in your state? Thank you for assisting me in this project, AnnMarie Brady PT APTA # 100650

I wanted to know if performing a doppler test under indirect supervision of a physician is included in our scope of practice. I know for billing reasons you have to get certified as a technician. I am already certified to do ABI's. Work with lymphedema / wound patients. Thank you, Laura Dye

Hello, I was wondering who I could direct a question towards in the use of yoked prisms by a physical therapist for prism adaptation in stroke and brain injured patients. I have seen numerous research articles and application in prisms to improved balance, spatial orientation, motor planning to neglected side, or to improve pen and paper spatial testing. In these most of these articles I have not seen the use of neuro optometry in prescription of prisms in clinically directed exercise sessions. Would it be within our scope of practice to use prism adaptation with in therapy sessions to improve balance, wheelchair manipulation, posture, and improve spatial motor mapping if educated in CEU's and neuro rehab of course. Thank you

Who do I talk to or how do I go about to get a law/rule answered or passed? I am an athletic trainer who has been trained to dry needle, but I also have a PTA license and work 100% of the time in a clinic under a PT who Dry Needles. I want to be able to needle but am limited since I'm functioning as a PTA. Please help.

I am hiring a rehab aide and a candidate has an associate of applied sciences degree from a PTA certified school, she has not passed her license test in over a year. Is she able to transfer patients (to bring them to therapy) typically our rehab aides are STNAs. Thanks

Hi. Is there any limiting in our practice act limiting a PT, PTA, OT or OTA from performing a screen at an assisting and independent facility without a physician referral? The screen consists of a question/answer section, followed by "hand off" observation of ROM, gait and transfers. The goal is to identify skilled therapy needs. If therapy is recommended, we will obtain a physician order for evaluation.

I am finding information that is contradictive in nature in regards to performing and billing for a Functional Capacity evaluation. Can an Athletic Trainer preform and bill for Functional Capacity Evaluations under Ohio law? Can a Physical Therapist Assistant preform and bill for a Functional Capacity Evaluation?

I am looking to highlight certifications during department meetings for both PT and OT professions, across our care continuum for Aultman hospital/ health foundation. I was wondering if there was a list of certifications (outside the specialization certifications) that were available to help enhance our clinical care. I know that there are Kinesiotaping and NDT certifications, as well as tai chi for arthritis, however I am unsure of where to find others. Any direction in this would be appreciated.
